

# EMPLOYMENT AND UNEMPLOYMENT

## Rapid information

5 August 1980

### EMPLOYEES BY NACE CLASSES OF INDUSTRY IN THE COMMUNITY

1974 - 1979

On the basis of the latest available statistical data according to NACE classes, the Statistical Office estimates that, in the Community as a whole, the number of employees engaged in Industry declined between April 1974 and April 1979 from 39.4 to 37.1 million. When considered year by year, it is seen that the greatest falls in employment occurred in the crisis years 1975 (- 3.0%) and 1976 (- 2.6%). During 1977 and 1979 the level of employment was fairly well maintained but in 1978 a reduction of 0.7% occurred.

Of all the branches of industry in the Community, there were least fluctuations in Energy and Water - NACE 1; rises and falls were of the order of 1%. In the other NACE divisions, excepting NACE divisions 4 and 5 during the year 1979, there were, for the entire period reductions in employment.

Within NACE divisions, the reduction in employment in the NACE class 22 was particularly pronounced (more than 4% in the years 1976 and 1978; this class includes the Iron and steel industry, affected since 1974 by a structural crisis. In NACE division 4 a marked reduction in employment took place in the classes 43, 44 and 45 (Textile and clothing industries). This reduction amounted to about 5% in the years 1975 and 1976, around 1% in 1977 and 1979 and almost 3% in 1978.

Employment in Building and civil engineering - NACE division 5 - contracted most sharply in 1975 (- 5.6%). In the three succeeding years the rate of decline was of the order of 1%. In the year 1979 the branch of industry appears to have shown some recovery, as it shows an estimated growth of 1.5%.

#### LIST OF TABLES

- TABLE 1 : Annual trends in numbers of employees in certain activities (%).  
TABLE 2 : Employees in certain activities as a proportion of total employees in industry (%).  
TABLE 3 : Proportion of female employees in industry, by NACE classes.  
TABLE 4 : Employees in employment in industry by NACE classes (' 000).

#### Source of data

\* The Community data for 1978 and 1979 were estimated by EUROSTAT. For technical reasons it was not possible to insert an asterisk indicating this.

Employees in employment by NACE classes

Harmonized statistics on employees in employment according to General Industrial Classification of Economic Activities within the European Communities (NACE) classes are drawn up annually on the basis of national surveys and processed applying Community concepts of both the definition of employees in employment and breakdown by activity. It refers to the situation at the end of March/beginning of April and covers all employees in employment on the territory of each Member State whatever the size of the establishment employing them.

Employees in employment consists of persons who work for an employer, whether public or private, and who receive compensation in the form of wages, salaries, fees, gratuities, payment by results or payment in kind.

The basic data were arrived at in each country as follows :

FR of Germany

Estimates by the Statistisches Bundesamt, based on the results of returns from employed persons subject to social security (Beschäftigtenstatistiken der Bundesanstalt für Arbeit). The statistics include civil servants and other persons not subject to social security.

France

INSEE estimates, based on the results of the general censuses of the population, updated by means of statements from employers to the National Union for Employment in Industry and Commerce (UNEDIC), and current statistics from the Ministry of Labour.

Italy

Estimates by the Ministry of Labour and Social Security, based on the results of quarterly surveys of employment in industrial undertakings with 10 or more employees, supplemented, in order to take small undertakings into account, by the results of the ISTAT labour force sample surveys.

Netherlands

Results of the survey on employed persons (werkzame personen) carried out by the CBS among a sample of undertakings with at least one employee.

Belgium

Results compiled by the Ministry of Labour for estimates of the number of workers subject to social security payments carried out by the National Social Security Office (ONSS).

Luxembourg

Estimates by STATEC on the basis of industrial surveys.

United Kingdom

Estimates by the Department of Employment using the results of the annual survey of employment conducted within all undertakings (Annual Census of Employment).

Ireland

The data are compiled in the new quarterly series, employment earnings and hours worked, where the NACE-classification has been introduced. The new series is linked to the annual Census of Industrial Production and carries revisions following on the availability of the final results of the 1975 Census of Production and other data.

Denmark

Estimates by the Danmarks Statistik based on current industrial statistics. The figures include employees in undertakings with less than six employees.
