

Industrial Trends - September 1991

Production NACE 1-4

Growth rate of the first half of 1991 compared to the first half of 1990

Stagnation of industrial production in first half of 1991

In the first six months of 1991 industrial production in the European Community remained **broadly unchanged**. There are no signs that the recession is nearing its end. The **production index** for EUR 12 in June 1991, adjusted for the number of working days, is estimated at 117.8 (1985 = 100), a change of 0.7% compared with June 1990. The seasonally adjusted index for June was 115.3%, compared with 115.9% in January. The seasonally adjusted production index fell by 0.4% between the first and second quarters of 1991. There has therefore been a **stagnation of industrial production**.

In the **USA**, the downward trend in industrial production seems to have been halted (quarter-on-quarter growth rate of 0.0%), whereas in **Japan** production does not grow any longer (-0.4% over the same period).

There are wide differences in the production of **various types of goods** in the European Community compared with the **2nd quarter of 1990**: the production of consumer goods grew, not least because of the considerable increase in production in Germany, whereas the production of capital goods fell in the wake of a decline in France, Italy and the United Kingdom. The cumulative rates of change between the second quarters of 1990 and 1991 for EUR 12 were:

- 0.8% for commodities and intermediate goods;
- 1.9% for capital goods (France: -5.2%, Italy: -5.9%, UK: -7.2%);
- +2.3% for consumer goods (Germany: +10%).

A comparison of changes of the last three months (April to June) with the preceding three months (January to March) in the seasonally adjusted production indices for all industries reveals some differences between individual **Member States of the EC**, but the overall trend is one of **downturn**: Denmark: +1.5%, Germany (pre-unification FRG): +1.1% [post-unification FRG: 0.8% (Eurostat estimate)], Greece: +0.3%, France: -0.4%, the Netherlands: -1.2%, Italy: -1.3%, UK: -1.3%, Ireland: -2.9%.

The **producer price index** for June 1991 rose by 3.2% on a year-on-year basis, which means that producer prices are rising somewhat faster than at the beginning of the year.

Manuscript completed on = 11.09.1991
