

Impact of the crisis on working conditions: Technical annex

Supplementary tables

Table A1 presents a final ranking of the countries obtained via the average ranking value. This value is based on a ranking of the countries in terms of the change in unemployment during the crisis (2007–2011) and a ranking of the countries based on the growth in GDP during the crisis (2008–2011).

	Final ranking	Change in unemployment (2007–2011)	Ranking based on unemployment*	Growth in GDP (2008– 2011)	Ranking based on GDP growth**	Average ranking value***

LV	27	9.70	4	-2.42	2	3
EL	28	9.40	5	-4.26	1	26

Notes: * Ranking: 1 = largest increase in unemployment rate; 28 = largest decrease in unemployment rate

** Ranking : 1 = smallest GDP growth (= GDP decline); 28 = largest GDP growth

*** Average ranking value = (ranking based on unemployment + ranking based on GDP growth) / 2

Source: Eurostat

Table A2 shows the countries studied classified on the basis of a ranking in terms of average GDP growth between 2008 and 2011 and the change in the unemployment rate between 2007 and 2011.

Weaker	Weak	Relatively weak	Average	Relatively strong	Strong	Stronger
PL (1)	BE (5)	RO (9)	FI (14)	UK (17)	LT (22)	ES (25)
DE (2)	NO (6)	NL (10)	BG (15)	DK (18)	EE (23)	IE (26)
MT (3)	SE (7)	LU (11)	CY (16)	HU (19)	PT (24)	LV (27)
AT (4)	SK (8)	CZ (12)		SI (20)		EL (28)
		FR (13)		IT (21)		
Classification	n standard: sta	ndard deviation	n from average	e (14.5) *	·	
[-1.75; -1.25]	[-1.25; -0.75]	[-0.75; -0.25]	[-0.25; 0.25]	[0.25; 0.75]	[0.75; 1.25]	[1.25; 1.75]

 Table A2: Size of the economic effect of the crisis in EU Member States and

 Norway

Notes: Ranking numbers are given in parentheses after the country code.

* Countries are classified into seven groups based on the standard deviation (SD) of their average ranking value related to the average (given in square brackets). For example, there is a group of 'weaker' countries with a ranking value within the bounds -1.75 SD from the average and -1.25 SD from the average.

Average = 14.5; SD = 7.48

Notes: percentage change in country average, 2007-2011

Indicators:

Job insecurity = change in proportion between 2007 and 2012 of working people who think it is 'very likely' or 'quite likely' they will lose their job within the next six months (source: EQLS)

Change in the proportion of temporary/part-time employed (2007–2011) who give as reason for temporary/part time employment that they 'could not find permanent/full employment' (source: LFS)

Change in net migration rate = percentage change between 2007 and 2011; net migration rate = immigration minus emigration (source: OECD)

Colour coding: Dark green = relatively strong positive change; light green = relatively positive change; light red = relatively negative change; dark red = relatively strong negative change in average

Table A10b: Synthesis map of changes in working conditions since the crisis (indicators: work–life balance, work intensity, absenteeism, work accidents, job satisfaction)

Notes: percentage change in country average, 2007–2011

Indicators:

Work–life balance, work intensity, absenteeism, work accidents: dummy coding based on reported national figures; 1 =increase; 0 =stable; -1 = decrease (between 2007 and 2011)

Job satisfaction: percentage of employees very satisfied (8–10 on 0–10 scale) (source: ESS, 2006, 2010)

Colour coding: Dark green = relatively strong positive change; light green = relatively positive change; light red = relatively negative change; dark red = relatively strong negative change in average
