Survey Overview

The Second European Quality of Life Survey was conducted in 31 countries. These consisted of the EU27, the three candidate and acceding countries (Turkey, Croatia and the Former Yugoslav Republic of Macedonia) and Norway.

The target of 1000 interviews was set for most countries, though the larger countries had bigger sample targets: 1500 interviews in Poland, Italy, France and the UK, and 2000 interviews in Turkey and Germany. The following table (Table 1), shows the target sample size and actual number of interviews for each country participating in the survey

Table 1: Completed interviews

| | Target number of interviews | Actual number of interviews |
|-----------------------|-----------------------------|-----------------------------|
| EQLS 2007 | 35,000 | 35,634 |
| Austria | 1000 | 1043 |
| Belgium | 1000 | 1010 |
| Bulgaria | 1000 | 1030 |
| Cyprus | 1000 | 1003 |
| Czech Republic | 1000 | 1227 |
| Germany | 2000 | 2008 |
| Denmark | 1000 | 1004 |
| Estonia | 1000 | 1023 |
| Greece | 1000 | 1000 |
| Spain | 1000 | 1015 |
| Finland | 1000 | 1002 |
| France | 1500 | 1537 |
| Croatia | 1000 | 1000 |
| Hungary | 1000 | 1000 |
| Ireland | 1000 | 1000 |
| Italy | 1500 | 1516 |
| Lithuania | 1000 | 1004 |
| Luxembourg | 1000 | 1004 |
| Latvia | 1000 | 1002 |
| Malta | 1000 | 1000 |
| Netherlands | 1000 | 1011 |
| Poland | 1500 | 1500 |
| Portugal | 1000 | 1000 |
| Romania | 1000 | 1000 |
| Sweden | 1000 | 1017 |
| Slovenia | 1000 | 1035 |
| Slovakia | 1000 | 1128 |
| Turkey | 2000 | 2000 |
| United Kingdom | 1500 | 1507 |

| | | |
|-----------|------|------|
| Norway | 1000 | 1000 |
| Macedonia | 1000 | 1008 |

In comparison to this, the First European Quality of Life Survey, conducted in 2003, covered the EU27 and Turkey, with a sample size of 1000 in the larger countries and 600 in the smaller countries.

Eligibility Criteria

In order to be eligible to participate in the Second European Quality of Life Survey, respondents needed to meet the following criteria:

- Be aged 18 years or older
- Have lived in the country for the last six months
- Be able to speak the national language(s) well enough to respond to the questionnaire
- Not be living in an institution (examples of institutions include prisons, hospitals and nursing homes)

Questionnaire testing and translation

In order to test the questionnaire fully, there were several stages involved in this process.

There was a pilot survey from 7th to 15th July in the United Kingdom and the Netherlands, with 100 interviews being conducted in each country. Following feedback from the two countries, the questionnaire was discussed and amended at a meeting between TNS opinion, the European Foundation and the UK National Centre for Social Research (NatCen).

The second stage of questionnaire testing was conducted through a pre-test in the 30 of the countries participating in the survey (This stage did not take place in the Former Yugoslav Republic of Macedonia because fieldwork began later there, after the final questionnaire had been agreed). All countries were sent the questionnaire in both English and French to translate into their local language. Two independent translations were made by two different people in each institute and these two translations were compared with each other and drafted into one single document by the two translators and the project leader in that country. This national translation was then checked. In order to ensure that the translation was definitive, the final translations were “back-translated” – this means that the questionnaire was translated from the local language back into English by an independent translator,

and then differences between this new English version and the original English were highlighted and resolved.

The pre-test consisted of 25 interviews per country, conducted from 20th to 27th August. The national institutes provided feedback from this pre-test by attending a seminar in Brussels on 30th August, which was also attended by TNS opinion, the European Foundation and NatCen. On 31st August, TNS opinion, the European Foundation and NatCen discussed this feedback and finalized the questionnaire. The main changes related to the interviewer protocol questions at the end of the questionnaire, and changing the format of the Contact Sheet.

The guidelines used for questionnaire development and translation are given in Annex 1.

The questionnaire was translated into all national languages. The majority of countries conducted the survey in one language, but there were some countries that have more than one major language group. The below table (Table 2) shows the number of interviews conducted per language in each country.

Table 2: Number of interviews per language

| | Language | Number of interviews |
|-----------------------|-----------------|-----------------------------|
| Austria | German | 1043 |
| Belgium | Flemish | 450 |
| | French | 560 |
| Bulgaria | Bulgarian | 1030 |
| Cyprus | Greek | 1003 |
| Czech Republic | Czech | 1227 |
| Germany | German | 2008 |
| Denmark | Danish | 1004 |
| Estonia | Estonian | 758 |
| | Russian | 265 |
| Greece | Greek | 1000 |
| Spain | Spanish | 973 |
| | Catalan | 42 |
| Finland | Finnish | 980 |
| | Swedish | 22 |
| France | French | 1537 |
| Croatia | Croatian | 1000 |
| Hungary | Hungarian | 1000 |
| Ireland | English | 1000 |
| Italy | Italian | 1516 |

| | | |
|-----------------------|-----------------|------|
| Lithuania | Lithuanian | 1004 |
| Luxembourg | French | 271 |
| | German | 10 |
| | Letzterbürgisch | 723 |
| Latvia | Latvian | 708 |
| | Russian | 294 |
| Malta | Maltese | 984 |
| | English | 16 |
| Netherlands | Dutch | 1011 |
| Poland | Polish | 1500 |
| Portugal | Portuguese | 1000 |
| Romania | Romanian | 1000 |
| Sweden | Swedish | 1017 |
| Slovenia | Slovenian | 1035 |
| Slovakia | Slovakian | 1128 |
| Turkey | Turkish | 2000 |
| United Kingdom | English | 1507 |
| Norway | Norwegian | 1000 |
| Macedonia | Macedonian | 785 |
| | Albanian | 223 |

Fieldwork progress

Fieldwork for the main stage of the survey started on 20th September 2007 and was due to finish on 20th November 2007.

Almost all countries completed the survey on schedule, with some finishing theirs a few days later, and Ireland and the Netherlands finishing fieldwork a week later. Further detail about fieldwork progress can be seen in the survey Fieldwork Report.

Fieldwork in Denmark was completed on 13th December and in Luxembourg on 18th January 2008. In both countries it was not possible to complete the required number of interviews within the original time frame. The reasons for these delays were poor response rates which make it much more difficult to conduct Face to Face fieldwork in these countries.

Fieldwork was conducted in Macedonia in February 2008, because this country was added to the survey at a later date, and so it was not possible to conduct fieldwork there until 2008.

In a number of countries, specific events occurred during the fieldwork period that may have affected respondents' answers. The list of these events is given in the below table:

| | Specific events during fieldwork |
|-----------------|--|
| Denmark | National elections held on 13 th November 2007 |
| Greece | Parliamentary elections held just before the start of fieldwork, on 16 th September 2007 |
| Poland | National elections held on 21 st October 2007 |
| Slovenia | Widespread flooding in late September in certain areas of the country. Presidential elections held on 21 st October and 11 th November 2007 |
| Turkey | Ramadan, from 13 th September to 12 th October 2007. |

Sampling Information

The majority of countries used a multi-stage stratified clustered design with random route for the selection of the respondent at the last stage.

The sampling selection process was random at each possible stage, i.e. the selection of primary sampling units, the selection of addresses, the selection of households and the selection of individuals aged 18 and over. Only one person from the same household was interviewed.

When countries used the “next birthday rule” to select a potential respondent within a household, they asked their contact in the household who was the person in that house with the next birthday, and then the interviewer would attempt to interview only the person with the next birthday within each household. Likewise, some countries interviewed the respondent from each household who had the “last birthday” and a few countries attempted to interview the household member with the “closest birthday” to the date of contact. This means that there is no bias in the selection of the respondent, because the interviewer is not simply selecting the respondent who is most likely to answer the door.

At least three recalls (i.e. four visits in total) were made, at different times of the day and on different times of the week/weekend, to increase the chance of interviewing the chosen respondent. The below table (Table 4) provides further details:

Table 4: Number of sample points

| | Sample size | Number of sample points used | Average number of interviews per SP |
|-----------------------|-------------|------------------------------|-------------------------------------|
| Austria | 1000 | 108 | 9,7 |
| Belgium | 1000 | 183 | 5,5 |
| Bulgaria | 1000 | 151 | 6,8 |
| Cyprus | 1000 | 116 | 8,6 |
| Czech Republic | 1000 | 399 | 3,1 |
| Germany | 2000 | 366 | 5,5 |
| Denmark | 1000 | 137 | 7,3 |

| | | | |
|------------------------|------|------|------|
| Estonia | 1000 | 203 | 5 |
| Greece | 1000 | 106 | 9,4 |
| Spain | 1000 | 238 | 4,3 |
| Finland | 1000 | 173 | 5,8 |
| France | 1500 | 336 | 4,6 |
| Croatia | 1000 | 156 | 6,4 |
| Hungary | 1000 | 102 | 9,8 |
| Ireland | 1000 | 165 | 6,1 |
| Italy | 1500 | 231 | 6,6 |
| Lithuania | 1000 | 114 | 8,8 |
| Luxembourg | 1000 | 77 | 13 |
| Latvia | 1000 | 103 | 9,7 |
| Malta | 1000 | 69 | 14,5 |
| The Netherlands | 1000 | 1011 | 1 |
| Poland | 1500 | 300 | 5 |
| Portugal | 1000 | 199 | 5 |
| Romania | 1000 | 113 | 8,8 |
| Sweden | 1000 | 106 | 9,6 |
| Slovakia | 1000 | 187 | 5,5 |
| Slovenia | 1000 | 182 | 6,2 |
| Turkey | 2000 | 401 | 5 |
| United Kingdom | 1500 | 175 | 8,6 |
| Norway | 1000 | 129 | 7,8 |

| | | | |
|------------------|------|-----|-----|
| Macedonia | 1000 | 175 | 5.8 |
|------------------|------|-----|-----|

The country samples were stratified by region (at NUTS level 2 or equivalent) and degree of urbanisation. Malta is the exception to this as here we used simple random sampling, as this improves the precision of the survey results. Denmark did not stratify by urbanisation because there is a relatively uniform level across the whole country.

In terms of regional weighting, some countries were too small to use NUTS level 3 weighting, and so they stratified by NUTS level 2 or other local regional definitions. Turkey, Croatia, Norway and Macedonia do not use NUTS, and so they used alternative regional classifications.

For some countries, they have regions that are very remote and hard to access, and so these were not considered in the sample. These regions are:

| | Geographical areas not covered | % of total population of country |
|------------------------|---|---|
| Denmark | Islands off the coast only accessible by ferry | 0.49 % |
| Finland | Åland Islands | 0.3 % |
| France | Corsica Guadeloupe Martinique Guyana Réunion | 0.5% 0.7% 0.6% 0.1% 1.0% |
| Greece | The islands in the Ionian Sea The islands in the northern Aegean Sea The islands in the southern Aegean Sea | 1.9% 1.9% 2.8% |
| Lithuania | Curonian Spit /Isthmus | 0.07% |
| The Netherlands | The northern islands (Texel, Vlieland, Terschelling, Ameland, Schiermonnikoog) | 0.2% |
| Portugal | Azores Madeira | 2.3% 2.4% |

| | | |
|-----------------------|---------------------------------------|--------|
| Spain | Ceuta | 1.8% |
| | Melilla | 1.6% |
| Sweden | A few mountainous areas in the north | 2% |
| United Kingdom | The Scottish Highlands and Islands | 0.35% |
| | The Scilly Isles | 0.004% |
| Norway | Low population density Northern areas | 5% |

Annex 5 of this Technical Report provides greater detail about the number of interviews conducted per strata (region crossed with urbanisation) for nearly all countries. This shows universe size, the planned number of interviews and sample points per strata, and the actual number of interviews and sample points per strata. Denmark and Malta are not included in this Annex because they did not use urbanisation weighting.

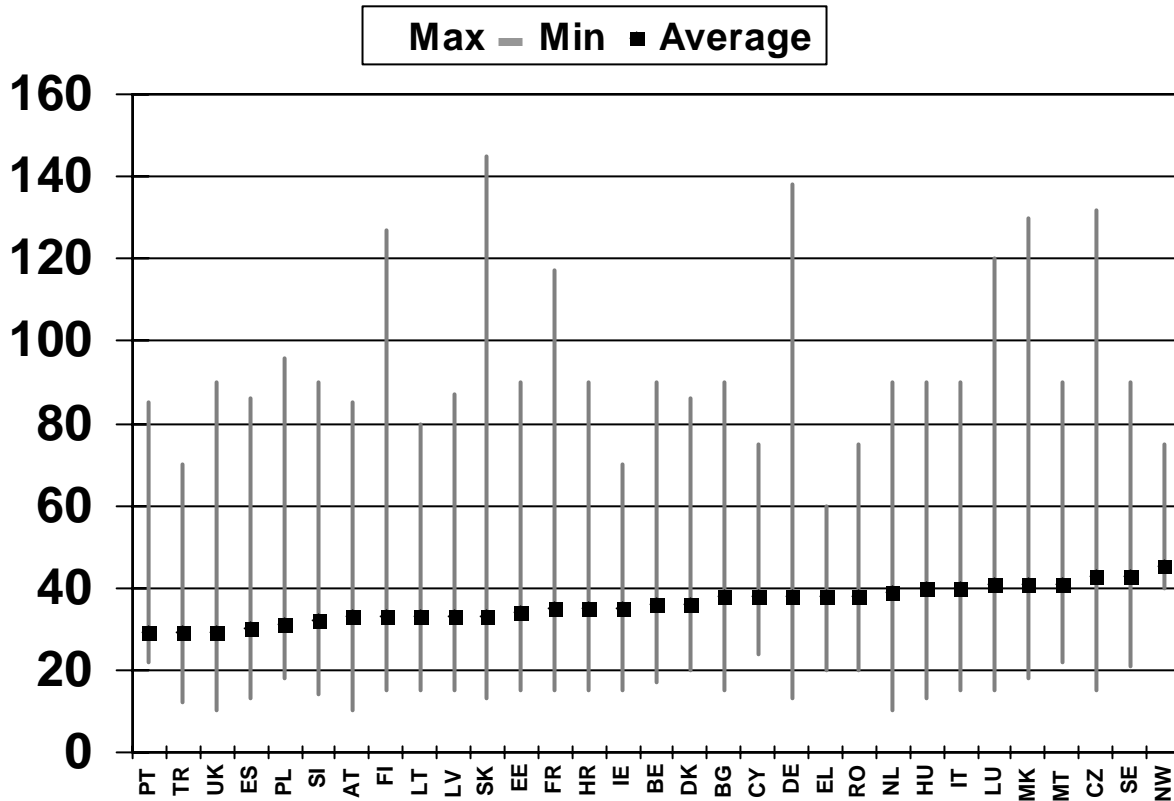

Sampling methodology deviations

In the Netherlands, Sweden and Norway, the sampling methodology deviates in that (part of) the sample was first recruited by telephone. Due to perceived difficulties in obtaining collaboration from citizens in face-to-face interviewing, it was decided in these countries that households would be pre-recruited by telephone. Interviewers only visited addresses of households where a willing respondent had already been selected during the telephone recruitment phase.

In the Netherlands, this method was applied to only part of the sample. 238 interviews were completed by contacting households using the random route methodology without prior telephone recruitment.

Interview Duration

The average length of interviews in the survey was 36.1 minutes. Average interview duration varied by country, from 29 minutes in the UK, Portugal and Turkey to 45 minutes in Norway. The below chart shows the variation in average interview length, and it also shows the range from the maximum interview length to the minimum interview length in each country.

Interview lengths varied by country because some countries used CAPI (Computer Assisted Personal Interview), whilst others use PAPI (Pen and Paper). CAPI is generally the quicker of the two methods. Another reason for interview duration variation is the cultural differences, as some of the concepts in the survey questions will be easier quicker to explain in some countries than in others.

Table 5 provides a more detailed analysis of interview duration by country.

Table 5: Interview duration

| | Interview duration | | | Duration categories | | | | |
|----------------|--------------------|-----|-----|---------------------|-------|-------|-------|------|
| | average | MIN | MAX | <15 | 15-29 | 30-44 | 45-59 | 60< |
| Austria | 33 | 10 | 85 | 6,0 | 33,6 | 48,4 | 9,0 | 3,0 |
| Belgium | 36 | 17 | 90 | - | 28,8 | 52,5 | 13,3 | 5,4 |
| Bulgaria | 38 | 15 | 90 | - | 20,8 | 48,3 | 20,7 | 10,2 |
| Cyprus | 38 | 24 | 75 | - | 4,9 | 78,8 | 13,3 | 3,1 |
| Czech Republic | 43 | 15 | 132 | - | 13,9 | 50,1 | 22,7 | 13,2 |
| Germany | 38 | 13 | 138 | - | 35,4 | 39,0 | 17,2 | 8,3 |
| Denmark | 36 | 20 | 86 | - | 31,6 | 48,8 | 16,2 | 3,4 |
| Estonia | 34 | 15 | 90 | - | 40,3 | 42,5 | 13,5 | 3,7 |
| Greece | 38 | 20 | 60 | - | 5,1 | 75,2 | 19,3 | 0,4 |
| Spain | 30 | 13 | 86 | 1,9 | 47,9 | 43,9 | 5,3 | 1,0 |
| Finland | 33 | 15 | 127 | - | 48,3 | 39,0 | 8,7 | 4,0 |
| France | 35 | 15 | 117 | - | 27,3 | 58,4 | 11,0 | 3,3 |
| Croatia | 35 | 15 | 90 | - | 13,6 | 74,2 | 11,3 | 0,9 |
| Hungary | 40 | 13 | 90 | 0,4 | 16,5 | 56,6 | 19,8 | 6,7 |
| Ireland | 35 | 15 | 70 | - | 18,3 | 66,2 | 11,9 | 3,6 |
| Italy | 40 | 15 | 90 | - | 8,2 | 58,9 | 26,8 | 6,1 |
| Lithuania | 33 | 15 | 80 | - | 21,9 | 68,9 | 8,3 | 0,9 |
| Luxembourg | 41 | 15 | 120 | - | 7,4 | 55,4 | 25,5 | 11,8 |
| Latvia | 33 | 15 | 87 | - | 41,7 | 46,4 | 9,4 | 2,5 |
| Malta | 41 | 22 | 90 | - | 9,0 | 56,8 | 29,5 | 4,7 |
| Netherlands | 39 | 10 | 90 | 0,3 | 20,7 | 50,2 | 21,4 | 7,4 |
| Poland | 31 | 18 | 96 | - | 54,4 | 34,5 | 8,1 | 3,0 |
| Portugal | 29 | 22 | 85 | - | 73,8 | 21,5 | 2,8 | 1,9 |
| Romania | 38 | 20 | 75 | - | 12,5 | 60,8 | 17,7 | 9,0 |
| Sweden | 43 | 21 | 90 | - | 4,3 | 49,2 | 37,4 | 9,1 |
| Slovenia | 32 | 14 | 90 | 0,2 | 48,3 | 38,5 | 9,7 | 3,4 |
| Slovakia | 33 | 13 | 145 | 2,4 | 39,8 | 45,1 | 10,3 | 2,4 |
| Turkey | 29 | 12 | 70 | 0,1 | 48,1 | 46,8 | 4,6 | 0,6 |
| United Kingdom | 29 | 10 | 90 | 2,2 | 60,5 | 29,9 | 5,4 | 2,1 |
| Norway | 45 | 40 | 75 | - | - | 60,2 | 31,0 | 8,8 |
| Macedonia | 41 | 18 | 130 | - | 10,0 | 59,0 | 24,5 | 6,4 |

Contact sheet analyses

TNS opinion centrally developed a uniform contact sheet to be used in all countries where random route sampling was applied. The contact sheet was adapted according to the sampling needs in the Netherlands, Norway and Sweden, where respondents were (partially) recruited via telephone and in Malta, where simple random sampling was applied.

The use of a centrally designed contact sheet has four main purposes:

- To ensure and control random selection methods;
- To ensure uniform inclusion rules;
- To monitor fieldwork progress centrally;
- To measure response rates uniformly throughout the countries.

To further ensure that the contact sheets were coded in a uniform way in each participating country, the national agencies received a data-map. In addition to a thorough briefing on how to use the contact sheets, TNS opinion analysed the interim data to check that the agencies understood what they were doing.

After completion of fieldwork, the national agencies each supplied TNS-opinion with a data-file of their processed contact sheets. These national contact sheet data-files represent the main input source for the response rate calculations, which were carried out centrally.

The first section of the contact sheet contains general information about the sample and the interviewer.

| | |
|-----------------------|---------|
| Country | (1:2) |
| Contact Sheet number | (3:12) |
| Interviewer Number | (13:22) |
| Stratification Number | (23:32) |
| Sampling Point Number | (33:42) |
| Postal code | (43:52) |

For each address visited, interviewers used a separate contact sheet. Interviewers first of all recorded what kind of address they were visiting. In case of a deadwood address (address not found/demolished or a non-residential property or inaccessible or dangerous area), interviewers were instructed to move on to the next address.

1 What kind of address is this? ... (Please circle the code that applies) (53)

| | | | | | |
|---------------------|---|---------------------|---|-------------------------------|---|
| Farm | 1 | Terraced house | 4 | Address Not Found/ Demolished | 7 |
| Detached house | 2 | Multi-unit building | 5 | Non residential address | 8 |
| Semi-detached house | 3 | Other | 6 | Area inaccessible /dangerous | 9 |

STOP
STOP
STOP

If codes 7, 8 & 9: END WITH THIS CONTACT SHEET and GO TO NEXT ADDRESS (USE A NEW CONTACT SHEET)

Interviewers subsequently recorded for each address the date and time of each visit and coded the outcome of each visit. In case of 'no-reply' they were required to return to the address 3 more times. After the 4th visit, they were allowed to abandon the address.

| VISITS RECORDS | | | | | | | | | | | | |
|-----------------|-----------|-----------|-----------|------------|-----------|-----------|------------|-----------|-----------|------------|-----------|-----------|
| | 1st visit | | | 2nd visit | | | 3rd visit | | | 4th visit | | |
| Date (dd/mm/yy) | (60:61) | (62:63) | (64:65) | (73:74) | (75:76) | (77:78) | (86:87) | (88:89) | (90:91) | (99:100) | (101:102) | (103:104) |
| Hour (hh/mm) | (66:67) | (68:69) | | (79:80) | (81:82) | | (92:93) | (94:95) | | (105:106) | (107:108) | |
| | 5th visit | | | 6th visit | | | 7th visit | | | 8th visit | | |
| Date (dd/mm/yy) | (112:113) | (114:115) | (116:117) | (125:126) | (127:128) | (129:130) | (138:139) | (140:141) | (142:143) | (151:152) | (153:154) | (155:156) |
| Hour (hh/mm) | (118:119) | (120:121) | | (131:132) | (133:134) | | (144:145) | (146:147) | | (157:158) | (159:160) | |
| | 9th visit | | | 10th visit | | | 11th visit | | | 12th visit | | |
| Date (dd/mm/yy) | (164:165) | (166:167) | (168:169) | (177:178) | (179:180) | (181:182) | (190:191) | (192:193) | (194:195) | (203:204) | (205:206) | (207:208) |
| Hour (hh/mm) | (170:171) | (172:173) | | (183:184) | (185:186) | | (196:197) | (198:199) | | (209:210) | (211:212) | |

| Results of the visit | | | | | | | | | | | | |
|----------------------|------|------|------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| | (70) | (83) | (96) | (109) | (122) | (135) | (148) | (161) | (174) | (187) | (200) | (213) |
| No reply | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 |
| Contact | 2 | 2 | 2 | 2 | 2 | 2 | 2 | 2 | 2 | 2 | 2 | 2 |
| Upfront refusal | 3 | 3 | 3 | 3 | 3 | 3 | 3 | 3 | 3 | 3 | 3 | 3 |

If code 1 - No reply - plan a NEW VISIT

If code 2 - Contact - record the gender of the contact person and continue with selection of respondent

If code 3 - UPFRONT REFUSAL - record the gender of the contact person and move to a NEW ADDRESS (NEW CONTACT SHEET)

For each address where contact was made, interviewers then coded the outcome of their visits.

| Outcome of the visits | | | | | | | | | | | | |
|--|--------|------|------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| | Visits | | | | | | | | | | | |
| | (72) | (85) | (98) | (111) | (124) | (137) | (150) | (163) | (176) | (189) | (202) | (215) |
| | 1st | 2nd | 3rd | 4th | 5th | 6th | 7th | 8th | 9th | 10th | 11th | 12th |
| Interview completed | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 |
| interview not realised because | | | | | | | | | | | | |
| No contact with selected adult | 2 | 2 | 2 | 2 | 2 | 2 | 2 | 2 | 2 | 2 | 2 | 2 |
| Selected adult refused to be interviewed | 3 | 3 | 3 | 3 | 3 | 3 | 3 | 3 | 3 | 3 | 3 | 3 |
| Selected adult away for fieldwork period | 4 | 4 | 4 | 4 | 4 | 4 | 4 | 4 | 4 | 4 | 4 | 4 |
| Selected adult ill at home/hospital | 5 | 5 | 5 | 5 | 5 | 5 | 5 | 5 | 5 | 5 | 5 | 5 |
| Selected adult physically or mentally unable | 6 | 6 | 6 | 6 | 6 | 6 | 6 | 6 | 6 | 6 | 6 | 6 |
| Selected adult has language difficulty | 7 | 7 | 7 | 7 | 7 | 7 | 7 | 7 | 7 | 7 | 7 | 7 |
| Fixed an appointment | 8 | 8 | 8 | 8 | 8 | 8 | 8 | 8 | 8 | 8 | 8 | 8 |
| Interview terminated | 9 | 9 | 9 | 9 | 9 | 9 | 9 | 9 | 9 | 9 | 9 | 9 |

If codes 2 & 8 : plan a NEW VISIT (at least 3 more visits, but keep trying)

If codes 1, 3, 4, 5, 6, 7 & 9 END OF CONTACT SHEET and move to NEW ADDRESS

Controlling the random selection of respondents

The contact sheet contains two sections to control the two levels where the selection of respondents is random

Interviewer supervisors were able to use the address data from the contact sheets to check that interviewers were following random routes correctly. For example, if an interviewer's contact sheets showed them to be visiting houses that were neighbouring, then this would prove that they had not followed the random route correctly. In order to ensure that interviewers were implementing random route methodology correctly, national institutes also checked random routes implemented against local maps.

In order to be able to check that in multi-unit addresses single dwelling unit was randomly selected, interviewers had to enter the number of dwelling units at the address and then enter the dwelling unit they selected.

² Please enter the number of dwelling units at the address (please count the number of bells and/or intercomm buttons) and record the number of the DU that has been selected following the random rules

of DU's at address

(54:56)

of DU selected

(57:59)

Furthermore, the contact sheet also includes a section that allows interviewers to record information about the eligible household members that facilitates the random selection of the respondent using the appropriate birthday rule.

⁴ Ask for the name (or initial) and date of birth of each person aged 18+ in the selected HH. Select the respondent who has the first or last birthday, according to the rule used by agency (first or last birthday rule)

| | Name/Initials | birthday | | | | Gender | | Selected resp. | | Name/Initials | birthday | | | | Gender | | Selected resp. |
|---|---------------|-----------|-----------|---|---|--------|---|----------------|----|---------------|-----------|-----------|---|---|--------|---|----------------|
| | | d | d/ | m | m | M | F | | | | d | d/ | m | m | M | F | |
| 1 | | (219:220) | (221:222) | | | (223) | | (224) | 7 | | (255:256) | (257:258) | | | (259) | | (260) |
| 2 | | (225:226) | (227:228) | | | (229) | | (230) | 8 | | (261:262) | (263:264) | | | (265) | | (266) |
| 3 | | (231:232) | (233:234) | | | (235) | | (236) | 9 | | (267:268) | (269:270) | | | (271) | | (272) |
| 4 | | (237:238) | (239:240) | | | (241) | | (242) | 10 | | (273:274) | (275:276) | | | (277) | | (278) |
| 5 | | (243:244) | (245:246) | | | (247) | | (248) | 11 | | (279:280) | (281:282) | | | (283) | | (284) |
| 6 | | (249:250) | (251:252) | | | (253) | | (254) | 12 | | (285:286) | (287:288) | | | (289) | | (290) |

It should be noted that in consultation with the European Foundation, interviewers were free to use this section at their discretion as it may deter potential respondents from participating if they were immediately asked to provide such detailed personal information. This section was subsequently not used in any of the analyses.

The entire contact sheet can be found in Annex 1.

Uniform inclusion rules

One of the advantages of a centrally designed contact sheet is that the same inclusion rules are applied in all countries. For this purpose, the contact sheet restates the definition of a valid household and reiterates which people aged 18 and over can be selected and which people need to be excluded.

| Selection of respondent | |
|---|--|
| <p>The definition of a household is: <i>"A household comprises one person living alone or a group of people living at the same address in a non-institutional dwelling, who have that address as their only or main residence, and who either share at least one main meal a day or share the living accommodation (or both)."</i></p> | |
| <p>³ Including yourself, how many people aged 18 or over live in this household? (Look at inclusion rules in box below)</p> <p style="text-align: center;"> (216:217) If '1' plan interview, else ask Q4 (218) and move to NEW ADDRESS (NEW CONTACT SHEET) </p> <p style="color: red; font-size: small;">If no one eligible, please tick the box</p> | |
| <p>INCLUDE:</p> <ul style="list-style-type: none"> • People who normally live at the address but are away for less than 6 months • People away at work for whom this is the main address • Boarders and lodgers | <p>EXCLUDE:</p> <ul style="list-style-type: none"> • People aged 18+ who live elsewhere due to work • Spouses who are separated and no longer resident • People away for 6 months or more • People resident in country for less than 6 months |

Monitoring fieldwork progress

Interviewers were instructed to regularly return completed contact sheets to the national field office to monitor fieldwork progress. The national agencies sent an interim contact sheet file to TNS opinion during fieldwork, so that response rates could be examined at an early stage of the survey (after they had completed 20% of their fieldwork).

Measuring response

On the basis of the information collected in the contact sheet, TNS opinion in collaboration with the European Foundation developed a formula for calculating the response rate.

The formula is as follows:

- From the gross sample, any deadwood addresses (codes 7 to 9 at Q1 of the contact sheet) and addresses without eligible residents (Q3 on the contact sheet and selected respondents with language difficulties at Q4) will be subtracted, which results in the net sample.
- The response rate is the percentage of interviews achieved from the net sample.

$$\text{Response rate (in \%)} = \frac{\text{number of completed interviews}}{\text{number of net sample}} \times 100$$

And

Number of completed interviews (n) = net sample (s) - number of non contacts of **all kinds** - number of refusals of **all kinds** (including terminated interviews) – number of deleted interviews after back-checking.

In countries where random route is used, the following points are all taken into consideration in the calculation of the non-response:

- There are two kinds of non-contact. The first is where the interviewer visits the address and there is no reply at the address. After 4 times, the address is declared as non-contactable (Q2 in the Contact sheet – results of the visit). There is a possibility that addresses with non-contacts would have had no-one eligible in the household, though these addresses are still counted in the net sample calculation. This means that response rates are marginally underreported because they still consider households where there may be no-one eligible.

The second type of non-contact refers to the non-contact with the randomly (next/last birthday) selected individual within the household. It consists of 5 different types of non-contacts at Q4 in the Contact sheet (Non-contact with selected adult; selected adult away for fieldwork period; selected adult ill at home/hospital; selected adult physically or mentally unable).

- Partial interviews are interviews that are terminated before they can be fully completed (Q4 in the Contact sheet).
- There are also two kinds of refusals. The first is where the interviewer visits the address and there is refusal at the door ('Upfront refusal' - Q2 in the Contact sheet – results of the visit).
- The second type of refusal refers to the refusal of the randomly (next/last birthday) selected individual within the household (Q4 in the Contact sheet ' Selected adult refused to be interviewed').

Response rates for Face-to-Face interviewing

The following table (Table 6) shows the net response rate and the % of refusals, the % of non-contacts and the % of interviews that were deleted after back-checking.

| | Response rate | Refusals | Non-contacts | Deleted after back-checking |
|---|---------------|----------|--------------|-----------------------------|
| | % | % | % | % |
|  BU | 81.9 | 15.7 | 0.4 | 2 |
|  RO | 78.5 | 10.8 | 10.8 | 0 |
|  PT | 73.5 | 20.1 | 6.4 | 0 |

*2003 method of calculating response rate = eligible sample - refusal rate. Eligible sample = gross sample - all non contacts. *In the Netherlands and Norway, the figures only pertain to the random route segment of the sample*

As noted earlier, in Sweden, and in the case of 77% of the interviews carried out in the Netherlands and 23% of interviews carried out in Norway, telephone recruiting was used because the chances of obtaining 1000 face-to-face interviews using random route is no longer considered feasible for a survey where the scheduled fieldwork period is relatively short (\pm 8 weeks) and where respondents receive no incentive.

For the interviews that were completed using telephone recruitment, it has not been possible to calculate the response according to the same methodology applied to the other samples. The following table shows the gross number of telephone numbers that were sampled in each of these three countries and the number of achieved interviews.

| Information for countries using telephone screening/recruitment | | | |
|---|-----|---|-----------------------------|
| | | Telephone numbers obtained / Gross figures | No. of interviews completed |
|  | SE* | 8050 | 1017 |
|  | NL | 12928 | 783 |
|  | NW | 2519 | 227 |
| <i>* In Sweden all interviews were completed using telephone recruitment</i> | | | |

The problem with telephone recruiting is that apart from having to deal with a large percentage of 'deadwood' numbers, in the event that contact is made it is even easier for a potential respondent to refuse on the telephone than when he or she has an interviewer at the door. This explains the low number of achieved interviews in proportion to the gross sample.

Overall, the survey shows that if there the fieldwork period is relatively short, face-to-face interviewing can be problematic in some countries. Furthermore, the amount of time available for fieldwork has a direct influence on the extent to which attempts can be made to convert refusals. For subsequent EQLS waves, we would make the following recommendations:

- If possible, the fieldwork period should be extended. Refusal conversions can then be carried out in countries where previous surveys (i.e. the ESS) have shown that has a sufficient positive effect on response.

- Prior to starting the next wave of the EQLS, multi-method pilots should be carried out to examine the effects of changing the data-collection method in countries where face-to-face interviewing is too problematic.

National response rates sheets

In Annex 6, the response rate information is presented separately for each country. The response rate sheets contain four columns with data: the first column provides the information in numbers, the second presents the % of these numbers on the basis of the gross sample and the third presents the % of these numbers on the basis of the net sample. The final column refers to the column numbers in the contact sheet data-file.

Data editing

TNS opinion ensured that all network member Institutes followed the same record layout by providing all countries with a detailed datamap.

TNS opinion controlled the quality of the national data files according to specific editing rules that are presented in annex 3.

Data Outputs

TNS opinion delivered the results of the survey in the form of an SPSS data file and detailed sets of tables that provided data by country and by key socio-demographic variables.

As well as including the survey data, these data files contained some computed variables. The main computed variable that was created was the OECD Equivalent Income Scale. This scale makes it possible to compare income of households with different size and composition by taking income data from Q67 and Q68 and then using the household questions to give different factors to households depending on the number of adults and children in the household. This income figure was then weighted according to the Purchasing Power Parity (PPP) to reflect how purchasing power varied for each country.

For the education question (Q49), all countries used the ISCED scale, which made it possible to compare education levels across countries with different systems of education.

The SPSS data file also contains data from external sources, so that further analysis can be done of the survey data. These external data sources contain information for each country on GDP per capita, population density, population size, Human Development Index values and other EurLife data.

Weighting

For each country a comparison between the sample and the universe was carried out. The Universe description was derived from Eurostat population data or from national statistics offices. For all countries surveyed, a national weighting procedure, using marginal and intercellular weighting, was carried out based on this Universe description. The data was weighted according to country (international weighting), region, level of urbanization, size of household, age and gender.

The below table (Table 7) shows the range of weighting values used in each country. Those countries with heavier weighting have a larger weighting range (i.e. they have a low minimum value and a high maximum value). The countries with the least weighting have a high minimum value and a low maximum value. For example, Malta had a small weighting value range of 0.6 to 1.7, because it used fewer weighting variables (gender, age and household size) than other countries.

Table 7: Weights per country

| | Minimum weighting value | Maximum weighting value |
|----------------|-------------------------|-------------------------|
| Austria | 0,2 | 3,6 |
| Belgium | 0,5 | 3,0 |
| Bulgaria | 0,2 | 2,9 |
| Cyprus | 0,4 | 2,7 |
| Czech Republic | 0,2 | 3,1 |
| Germany | 0,3 | 3,4 |
| Denmark | 0,2 | 3,8 |
| Estonia | 0,3 | 3,5 |
| Greece | 0,2 | 3,1 |
| Spain | 0,2 | 2,9 |
| Finland | 0,3 | 3,6 |
| France | 0,2 | 3,5 |
| Croatia | 0,2 | 2,8 |
| Hungary | 0,2 | 3,2 |
| Ireland | 0,2 | 3,1 |
| Italy | 0,2 | 3,0 |
| Lithuania | 0,2 | 3,6 |
| Luxembourg | 0,3 | 3,1 |
| Latvia | 0,2 | 3,2 |
| Malta | 0,6 | 1,7 |
| Netherlands | 0,2 | 3,5 |
| Poland | 0,2 | 2,8 |
| Portugal | 0,2 | 3,0 |
| Romania | 0,2 | 2,7 |
| Sweden | 0,3 | 3,6 |

| | | |
|-----------------------|-----|-----|
| Slovenia | 0,3 | 2,8 |
| Slovakia | 0,2 | 2,9 |
| Turkey | 0,2 | 2,5 |
| United Kingdom | 0,3 | 3,5 |
| Norway | 0,2 | 3,5 |
| Macedonia | 0,2 | 2,3 |

The weighting effect can also be seen by looking at the “Effective Sample Percentage” for each country. This is calculated by using the following formula:

Effective sample percentage = (100 x B) divided by (N x C)

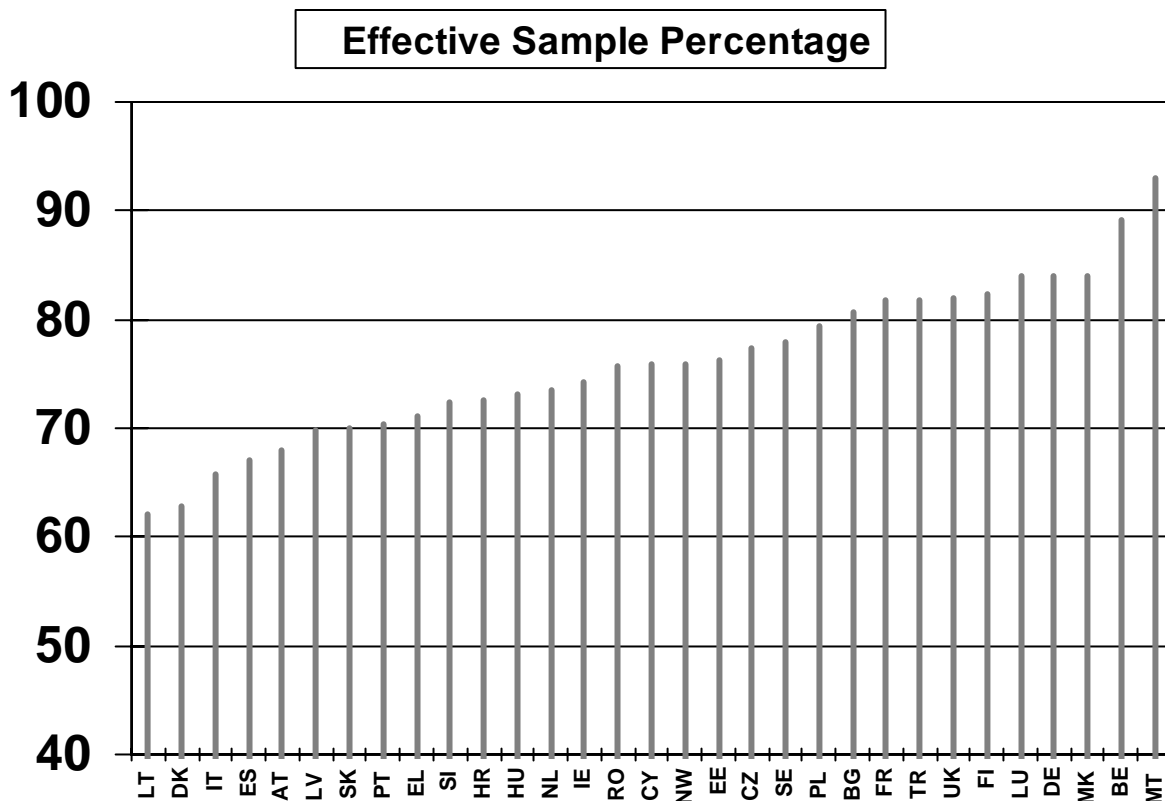

Where: A = sum of weights

B = squared A

C = sum of squared weights

N = number of questionnaires

Using this calculation, if a country has all perfect weights with value “1”, then their Effective Sample Percentage will be 100%. The below chart shows that Malta has the highest Effective Sample Percentage, 93%, and Lithuania the lowest, 62%. A table showing these figures in more detail, along with the maximum and minimum weighting values per country, is in Annex 2.

The weighting books for age, gender, level of urbanisation and region were requested from the institutes involved in this survey prior to the start of fieldwork. These weighting books are based on national statistics that are either the same as those available on Eurostat or more up-to-date national statistical data.

1. International weighting

The data was weighted by population size of the participant countries. This means that the interviews in larger countries had a greater impact on total results than interviews conducted in smaller countries. This removed the bias that may occur due to a proportionally greater number of interviews in smaller countries.

For international weighting (i.e. EU averages), TNS opinion applies the official population figures as provided by Eurostat or national statistic offices.

Table 8 in Annex 2 at the end of this document shows the international weighting factor for each country participating in the survey.

2. Region

Within almost all countries, there was weighting by region. Countries used NUTS 2 regions as their regions for this weighting. This category refers to regions belonging to the second level of regional classification within the EU (NUTS 2, also known as NUTS II), which is largely used by Eurostat and other EU bodies.

There were some small countries in this survey that only consist of one NUTS 2 region themselves (Republic of Cyprus, Denmark, Estonia, Lithuania, Luxembourg, Latvia, Malta, Slovenia). These countries used their own regional weighting criteria, with the exception of Malta which used no regional weighting at all. Croatia, Norway, Macedonia and Turkey are not members of the EU and so they do not have NUTS 2 regions: instead, they used their own regional weighting classification.

The regional codes used in each country are shown in Annex 4 of this document. This annex also provides information about how the regional variation in interviews differed from the universe size and it gives the data source for this regional information.

3. Level of urbanization

Within almost all countries, level of urbanization was also a weighting factor. Countries were able to choose their own urbanization weighting factor, usually using urbanization codes that they use in numerous other surveys, such as the Eurobarometer.

Denmark and Malta did not do urbanization weighting, because there is too much uniformity of urbanization in these countries. Therefore, weighting by urbanization there is ineffective.

The urbanisation codes used in each country are shown in Annex 4 of this document. This annex also provides information about how the urbanisation variation in interviews differed from the universe size and it gives the data source for this urbanisation information.

4. Size of household

Almost all countries weighted their data by household size. That is, they weighted their data against the population data according to household size. We use adults in size of household because our sample is based on the number of adults 18+, not on the number of households. The following size categories were used:

| |
|-------------------------|
| 1 adult in household |
| 2 adults in household |
| 3 adults in household |
| 4 + adults in household |

Most countries used latest Eurostat data, looking at the proportion of the population living in each size of household. However, Belgium, Denmark, the Netherlands and the UK used other data sources provided by the national institutes, which were considered to be more up-to-date than the Eurostat data. Croatia, Malta, Sweden and Turkey were not covered by Eurostat data and so used Eurobarometer data as a source. There was no reliable data source for Macedonia, and so as a result Macedonia was not weighted by size of household.

Annex 4 summarises the household size variation and weighting for each country surveyed.

5. Age and gender

All countries weighted their data by age crossed with gender. The age/gender categories that all countries used for their weighting were:

| |
|-----------------------|
| Man 18-24 years old |
| Man 25-34 years old |
| Man 35-49 years old |
| Man 50-64 years old |
| Man older than 65 |
| Woman 18-24 years old |
| Woman 25-34 years old |
| Woman 35-49 years old |
| Woman 50-64 years old |
| Woman older than 65 |

Again, Annex 4 of this document provides information about how the age/gender variation in interviews differed from the universe size and it gives the data source for this age/gender information.

Weighting summary

The definition of the target of the EQL survey is the adult population in private households. In order to be representative in terms of gender, age, urbanisation level, region and household composition, we apply a weighting procedure in two stages (two types of weighting coefficients).

With the exception of Malta and Belgium, we first apply the number of adults in the household as a design weight and therefore a pre-weight to our main rim-weighting. This pre-weighting is necessary to correct the design effect of our sampling procedures (with exception of Malta and Belgium, which are countries without design effect). It equalises unequal selection probabilities: the selection of the single individual from the dwelling unit is irrespective of how many individuals were identified there. The compensation is proportional to the number of adult individuals identified at the dwelling unit (for example, in household with 3 adults the weight of the respondent is multiplied by 3).

The second stage (main rim weighting) compensates for differential non-response amongst sub-groups (non-response weights or the shortfalls in the sample profile achieved). The variables taken into consideration in the weighting procedure are:

- Age crossed with Gender
- Urbanisation level
- Region
- Household size (adults in size of household)

ANNEX 1

1. Tracking information

The below table details the questions that are trend from the first European Quality of Life Survey in 2003. Those questions that are trend (modified) are also highlighted.

| Questionnaire 2007 | Questionnaire 2003 |

| Q63 | Q63 |

2. Guidelines on specific questions

This section provides a little more explanation about particular questions. This helped instruct interviewers in how to respond to any questions that respondents may ask them during the interview.

| | |
|-------------|--|
| HH1 | <p>This question asks for the total number of people in the household (including children). You will have already recorded the number of people aged 18 or older on the contact form to select the respondent.</p> <p>If you should discover at this stage that you have been given the wrong information for the contact form selection:</p> <ul style="list-style-type: none"> • Do NOT change the contact form or redo the selection procedure • DO record the correct information at HH1 • MAKE a note of what happened beside the household grid. <p>Remember: a household comprises one person living alone or a group of people living at the same address in a non-institutional dwelling, who have that address as their only or main residence, and who either share at least one main meal a day or share the living accommodation (or both). Please include: people away for less than six months (for example, people on holiday, or away working temporarily). Please exclude people away for six months or more (for example, students), people away for six months or more or temporary visitors.</p> <p>More details of what we mean by 'household' can be found in Section I.</p> |
| HH3b | <p>Children aged younger than one year old should be coded as '1'.</p> |
| HH3d | <p>This question establishes the 'economic status' of all adults (aged 18+) in the household. Some more information about the categories is provided below:</p> <p>1. At work as employee or employer/self-employed</p> <p>This category includes all types of paid work, whether for an employer, or on the respondent's own account as self-employed.</p> <p>Please include:</p> <ul style="list-style-type: none"> • Casual, part-time and temporary work. • People absent from work last week because of sickness or injury, holiday or compassionate leave, provided that they have a job to go back to with the same employer or as self-employed in the same field. • People who were temporarily laid off, or on strike, or locked out, again provided that they have a job with the same employer to go back to, or to the same self-employed status. • People whose contract of employment incorporates regular but intermittent work (e.g., some staff in educational institutions, or professional sportsmen, whose wages are paid only during term-time or in the season, and who therefore may not have worked last week). • Someone who owns a business is considered as self-employed and therefore also |

| | |
|--|---|
| | <p>belongs to code 1 as long as they are working in this business and not just living off its profits.</p> <p>Exclude:</p> <ul style="list-style-type: none"> • Voluntary work • Work carried out where only expenses are reimbursed or work paid for in kind (e.g., receiving board and lodgings only) where there is no financial transaction. <p>2. Employed, on child-care or other leave</p> <p>This covers people who are temporarily away from their job (for more than a week) because of child-care leave, maternity leave, sabbatical leave, or other leave, provided that they have a job to go back to with the same employer or as self-employed in the same field.</p> <p>3. At work as relative assisting on family farm or family business</p> <p>This category only includes people who do not receive a formal wage or salary for their work.</p> <p>4 or 5. Unemployed (less than 12 months & 12 months or more)</p> <p>This category includes all unemployed people, including those seeking work through central or local government employment services, people registered with private employment agencies, people answering advertisements for work, advertising for work or even people just actively looking around for opportunities. Interviewers may need to probe about the length of unemployment if necessary.</p> <p>Exclude:</p> <ul style="list-style-type: none"> • People on leave from their job and thus have a job to return to (code 5) • Those who are ill and temporarily unable to look for work (who should be entered as code 6). <p>6. Unable to work due to long-term illness or disability</p> <p>This covers people out of work and not seeking work because of permanent (or indefinite) sickness or disability. It includes people who have never worked because of disability. In cases of doubt over whether an illness or disability is permanent, treat it as permanent if it has lasted continuously for six months or more.</p> <p>Do not include retired people in poor health who would not be seeking work even if they were healthy (code 7).</p> <p>7. Retired from work</p> <p>This covers people who have retired from their occupation at approximately the normal retirement age or who have taken 'early retirement', and are not seeking further employment of any sort. Retired people who are permanently sick or have become disabled still count as retired.</p> <p>Women who leave work on marriage to look after the home or to raise a family and who have not worked for many years, should be classified as 'looking after the home' rather than retired. But it is difficult to define retirement exactly. Apart from the proviso made about women, the respondent's description from the card should generally be accepted.</p> <p>8. Full-time homemaker</p> <p>This covers anyone more or less wholly involved in unpaid domestic or caring duties.</p> |
|--|---|

| | |
|---------------------|--|
| | <p>9. In education (at school, university etc)/ student</p> <p>Please include:</p> <ul style="list-style-type: none"> • All students, even those doing vacation jobs. • If the student is on vacation and will continue to be a student only if he or she passes an exam, assume that the exam will be passed and still treat the respondent as in full-time education. <p>10. Other</p> <p>This option is not shown on the show card. It covers anyone who does not fit into any of the 9 categories on the card. But remember that people who are in any kind of paid work (including casual self-employed jobs) should not be included here.</p> |
| <p>Q2-10</p> | <p>These questions are about the respondent's current or most recent job (if they are currently out of work). You will need to adapt the tenses of the questions as appropriate.</p> <p>If the respondent has more than one job you should ask them to think about their 'main' job. We have added interviewer instructions to the questions to make this clear. A 'main' job is defined as the job that occupies them for the most hours per week. If they have two jobs that are exactly equal, they should answer about the more highly paid of the two.</p> |
| <p>Q4</p> | <p>A person with a permanent job should be coded as being on an unlimited permanent contract (code 1). Temporary employment agency (code 4) implies that a person is paid through an agency that has arranged the job (thus, the contract is with the agency and not with the company where the work is being done). An apprenticeship / training scheme (code 5) is different from a temporary / fixed term contract in that the aim is to learn a skill.</p> |
| <p>Q5</p> | <p>This question asks respondents about the 'sector' they work (or worked) within. Some examples of different sectors follow, although please remember that these may vary from one country to another:</p> <ul style="list-style-type: none"> • 'Private sector' should include all private sector firms or companies. • 'Public sector' should include all nationalised industries and public corporations, as well as any other public sector employer. Examples of these employers will vary across Europe but may include state-funded schools and hospitals, as well as bodies concerned with local, regional or central government. • Joint private-public: companies which are partly owned by the State and partially in private ownership. Think of companies where the State has sold off some of its shares to private owners • 'Non-for-profit sector, NGO (non-governmental organisations) should include those who work for charities and other non-profit making bodies, |
| <p>Q6</p> | <p>This question asks the total number of hours normally worked in a week, including any paid or unpaid overtime. Weekend working may be included. A self-employed freelancer should be asked to give an average. If this is not possible, use code 999.</p> <p>If the respondent gives the hours in decimals, round up to the nearest hour: i.e. 37.5 hours should be coded as 38.</p> <p>If the respondent has more than one job, please note that we need to know the number of hours worked in the main job only.</p> |

| | |
|----------------------|--|
| <p>Q8</p> | <p>Again if the respondent gives the hours in decimals, round up to the nearest hour: i.e. 37.5 hours should be coded as 38.</p> |
| <p>Q11</p> | <p>If someone is not sure how to answer these questions because he/she does not have a family or does no household jobs, please code him/her as 'never'.</p> |
| <p>Q13/14</p> | <p>We would like to collect the occupational details of the person who contributes the most to the household income. If this person is not the respondent, you will need to ask Q13 or Q14 about this other person's current or most recent occupation.</p> |
| <p>Q15</p> | <p>This question is not only asking about the number of bedrooms in the accommodation. In counting the number of rooms please follow these rules.</p> <ul style="list-style-type: none"> • Include: living rooms, dining rooms and bedrooms. Also include studies as long as they are not only used for business purposes. So, for instance, if someone has a study at home that he/she uses for work, but other people in the household also use this room (for example, to use a computer), you should include it in your count. • Exclude: kitchens, bathrooms, toilets, hallways, garages, storage rooms, and rooms only used for business (for example, a shop, workshop or office). <p>What should be done if the accommodation is shared by more than one household? Accommodation is defined as the home (e.g. house, flat, apartment or farm) in which the respondent and his/her family live. So:</p> <ul style="list-style-type: none"> • If the respondent lives in a dwelling or house with several apartments, he or she should say how many rooms there are in his/her apartment. • If there are several families sharing one house, apartment, flat or farm and together they constitute the same household (see definition of household at HH1), all rooms in the house would be counted. |
| <p>Q16</p> | <p>Codes 1 and 2 refer to ownership of the accommodation:</p> <ul style="list-style-type: none"> • At code 1, the property no longer needs to be paid off – it is fully owned by the household. • At code 2, the respondent is still paying in order to buy the property. In most countries this will be through a mortgage, but it could be being bought through a loan or credit. Thus the focus of code 2 should be that the respondent is paying in order to own the property. <p>Please note that this question is about the accommodation in which the household resides, rather than being only about the respondent's situation, if this is different. This means:</p> <ul style="list-style-type: none"> • If the respondent lives at home with his parents and they own their own home, code 1 or 2 would be used, regardless of whether rent is paid to the parents or not. • If the respondent lives in property that is owned by family who do <u>not</u> live there and he pays rent to them, code 6 should be used. If rent is not paid, code 5 should be used. <p>You may include at code 4 people living in “company housing”, the assumption being that the respondent pays rent to his employer. If the accommodation is provided by the employer rent free, please use code 5.</p> <p>If the respondent is living in co-operative housing (which maybe organised privately but is marked by a non-profit approach), code 4 should be used.</p> |

| | |
|---------------------|---|
| <p>Q18</p> | <p>This question applies to all respondents, irrespective of whether they own or rent their home. So:</p> <ul style="list-style-type: none"> • We are thinking here of people who might leave their accommodation because they can not afford the rent, or cannot afford to keep up their mortgage payments, or other housing related costs. • There is no 'not applicable' code at this question. If someone has no or very low housing costs (for example, they own their own home or do not pay rent), they should be coded 'quite' or 'very' unlikely to move. • If someone thinks they will move within the next six months, but not because they can no longer afford their home (for example, they are moving because of their job), they should be coded 'quite' or 'very' unlikely to move. |
| <p>Q19</p> | <p>c) 'Worn-out' means old, broken or torn.</p> <p>f) We are referring to people (friends, family) coming to the respondent's house for a drink or a meal at least once a month. It does not mean taking friends or family out for dinner in a restaurant.</p> |
| <p>Q20c.</p> | <p>By 'public officials' we mean both elected and non-elected public officials, at any level from central to local government.</p> <p>Please note the instruction to exclude 'routine contact arising from the use of public services'. This means you should:</p> <ul style="list-style-type: none"> • Include: contact with a public official relating to a respondent's views of government policy or what government should do. Contact with public officials can be included here if it is 'non-routine' – for example, a person writing to an elected official because of problems they are experiencing in their use of public services. • Exclude: 'everyday' contact with public officials about issues relating to public services (for example, contact with officials over routine issues to do with housing, education, reporting crime or claiming welfare benefits). |
| <p>Q21</p> | <p>This question contains two 'yes' codes: 1: 'yes' and 2: 'yes, but I spoil my ballot / I left my ballot blank'. Interviewers must read out this distinction.</p> |
| <p>Q22</p> | <p>This question is about attendance at religious services (at churches, mosques, synagogues, temples etc.) rather than religious observance at home. So you should not include, for example, time spent praying at home.</p> |
| <p>Q23</p> | <p>This is a general question. It does not refer to a specific group of people.</p> |
| <p>Q24</p> | <p>This question aims to establish whether the respondent thinks that other people 'obey the rules' in three different respects.</p> <p>In the first two examples (paying taxes and traffic laws), these rules will usually take the form of clear laws.</p> <p>In the third example (showing consideration for others in public places), these rules may be less clear and more informal. If someone is unclear how to answer this question, please record their answer as 'don't know'.</p> |
| <p>Q26</p> | <p>This question is about the rules that government should put in place regarding people coming into the country to work. It is not about asylum seekers or illegal immigrants.</p> <p>Please note that this is not a 'read out' question – you should just show the respondent the card/screen, and record their answer.</p> |

| | |
|--------------------------|--|
| <p>Q27</p> | <p>Some respondents might find it difficult to distinguish between some of these categories:</p> <ul style="list-style-type: none"> • By ‘government’ we mean a central executive body within a country. • By ‘parliament’ we mean the national legislative body. • ‘Legal system’ refers to the entire system and not to a specific legal entity within the country • ‘Press’ refers to all printed sources of news information <p>If someone is unable to provide an answer to any of these questions, please use the ‘don’t know’ code.</p> |
| <p>Q28f</p> | <p>Attention: This is the only item in Q28 that is formulated negatively. So be careful that the respondent’s answer points in the intended direction.</p> <p>Note that “what I do” refers to what people do in the broad sense and not only to their job.</p> |
| <p>Q28g</p> | <p>Job situation: refers to unemployed people as well</p> |
| <p>Q31</p> | <p>The instruction in the questionnaire is long and serves as an aid in cases where respondents query what is meant by “children of your own”.</p> |
| <p>Q32</p> | <p>Direct face-to-face contact means more than just seeing a person, implies that there is also verbal communication</p> |
| <p>Q32/33</p> | <p>This question concerns contact with people outside the household.</p> <p>If someone does not have any of the relatives in question (for example, he or she has no children at 32a), or lives with their only children (and thus has no children living outside the household), please use code 7.</p> <p>Please note that code 7 is not applicable for Q32d or Q33d, for obvious reasons.</p> |
| <p>Q33</p> | <p>Please use code 7 if the respondent has told you at Q32 that they have no such relative living outside their household. For example, if someone said at Q32b that they lived with their mother and father, you should code 7 at Q33b and not ask the question.</p> |
| <p>Q36a, Q37a</p> | <p>The term ‘educating children’ is broad and refers to bringing them up – it does not mean that the respondent is their teacher. The respondent could be caring for his or her own children, his/her grandchildren or for someone else’s children (but not if this was part of a paid job).</p> |
| <p>Q37</p> | <p>For those involved in activities for up to one hour per week (e.g. half an hour a week for voluntary activities), please code them as “1”. If respondent provides the number of hours in decimals (e.g. 2.5 hours) please round up to the nearest number (e.g. 3 hours).</p> |
| <p>Q39c-e</p> | <p>There is no ‘not applicable’ code for these items. If someone does not spend any time on an activity listed at Q39c)-e) they should be able to answer the question by indicating whether they feel they spend ‘too little’ time on that particular activity (that is, they would like to spend more time) or whether they feel the amount of time they spend is ‘just right’.</p> |
| <p>Q40/Q41</p> | <p>The first of these questions (Q40) asks people how satisfied they are with various elements of their lives. The second (Q41) asks how important particular issues are in their quality of life.</p> |

| | |
|--------|---|
| Q48 | This question asks about full-time continuous education . This refers to the period of full-time education which spans school and any other full-time education undertaken after school, but excludes vocational training which is not school based. If the respondent has suspended his/her education for more than one academic year, the age to refer to would be the respondent's age at the beginning of that break. |
| Q49 | You may need to probe further to establish the correct code to use at this question (for example, to establish what age a person was when they finished their education). If you cannot establish which of the codes applies, please record as much information as possible at the 'other specify' option. |
| Q51 | This question is about all internet use by the respondent. So please include internet use at home and at work/college. |
| Q53 | This questions seeks to establish how similar or different the local neighbourhood in terms of its ethnic composition when compared with the country as a whole. If a respondent asks your advice about the race/ethnic group of 'most people in (country)', please do not provide guidance; simply ask them to answer as best they can. If they cannot answer, please use the 'don't know' option. |
| Q54/55 | It is up to the respondent to decide upon the meaning of the term 'immediate neighbourhood'. |
| Q55f | Recycling facilities: a place where people can bring goods for recycling purposes (does not include recycling bins on property). |
| Q67/68 | <p>At these questions you should obtain the total net income of the household from all sources, that is, after tax. Please bear in mind:</p> <ul style="list-style-type: none"> • Income includes not only earnings but state benefits, occupational and other pensions, unearned income such as interest from savings, rent, etc. • We would like to get figures after deductions of income tax, national insurance, contributory pension payments and so on. • The questions refer to current level of income or earnings or, if that is convenient, to the nearest tax or other period for which the respondent is able to answer. • If the respondent will not provide an amount at Q67, Q68 provides a showcard that should help them to identify their weekly, monthly or annual income, whichever they find easiest. They will then give you the letter that corresponds to the appropriate amount. This system is designed to reassure the respondent about the confidentiality of the information they are giving. • If someone cannot or does not want to answer either Q67 or Q68, please use 'don't know' or 'refusal' as appropriate. |
| Q69 | Citizenship: Ask e.g. if the respondent has a passport of the country he lives in. |
| Q70 | <p>Please note that both codes 2 and 3 apply to respondents who were born in Europe. If they do not know whether their country of birth is currently a member state of the EU, code 'don't know'. If asked to check, the list of countries on the front of these project instructions should help (remember that Norway, Turkey and Croatia are not members of the EU).</p> <p>Please include in code 5 anyone born in New Guinea or the islands of the Malay Archipelago.</p> |

3. Translation notes

Please find below a list of remarks that could be useful for the translation/ correct understanding of the questionnaire:

- HH grid D A **full-time homemaker** is a full-time housewife, househusband. The person that stays at home to cook, do the shopping, look after the children, etc.
Long-term illness: permanent or at least without the foresight of being able to return to work in the near future.
- Q4 **Temporary employment agency** implies that one is paid through an agency that has arranged the job, that the contract is with the agency and not with the company where one is working.
Apprenticeship/ training scheme: different from a temporary/ fixed term contract in that the aim is to learn a skill
- Q5 **Private sector:** companies/businesses that are in private hands, not owned by the state
Public sector: here we mean government (at all levels) and institutions / organisations which are fully owned by the state (e.g. schools, hospitals as long as they are not private)
Joint private-public: companies which are partly owned by the State and partially in private ownership. Think of companies where the State has sold off some of its shares to private owners.
Not-for-profit sector/NGO's: companies which are in private hands but which do not operate to make profit: think of charity organisations. NGO: stands for Non-Governmental Organisation
- Q10 **Great deal of influence:** the power to make decisions, having a say about things.
Good prospects: chances, possibilities that are very likely to be fulfilled.
- Q11 Family responsibility refers to the immediate family.
- Q12 **Contributing the most to the household income:** means bringing in the highest sum of income into the household. The question is asked to see if other people in the household earn more than the respondent; if this is the case they are then asked what kind of work they do.
- Q15 The **accommodation:** the home (e.g. house, flat, apartment or farm) in which the respondent and his / her family live.
We want to know how many rooms the accommodation has which people use to live, sleep, study, dine and play in. Rooms that are not used for living purposes need to be excluded in the count: see the examples.
- Q16 **Tenant:** someone who lives in rented accommodation.
- Q17 Lack of: might cause problems in translation. Try to avoid a double negative if possible (e.g. German "fehlende" instead of "keine").
- Q19 **Worn-out:** old, broken or torn.
- Q20 **Public officials:** includes both elected and non-elected public officials, at any level from central to local government

- Q21 **National:** refers to the last election of a country's primary legislative assembly.
- Q22 **Attend: means that the respondent goes to** a church, a synagogue, a mosque, a temple, etc. for the religious services. It does not refer to prayer at home.
- Q23 **Can not be too careful:** need to be wary or always somewhat suspicious.
- Q24 **Public places:** any buildings or locations that are open to the general public
- Q25 **Management:** the people who run a company, the directors of a company, those who make the decisions about the workers.
Different racial and ethnic groups: people of different racial or ethnic backgrounds.
Different religious groups: people of different religions (e.g. muslims and Christians).
- Q27 **Parliament:** the national legislative body (e.g. Germany "Bundestag", Poland "Seim").
Legal system: refers to the entire system and not to a specific legal entity within the country
Press: generic terms, refers to all printed sources of news information
Government: the central executive body within a country
- Q28 **Getting ahead:** improving one's financial situation, progressing economically.
Feeling left out: feeling excluded; not being part of something.
Not finding one's way: feeling unable to cope.
Recognised by others: respected, understood by others.
- Q31 **Children of your own:** this includes adopted children but excludes step-children.
- Q32 **Direct face-to-face contact:** means more than just seeing a person, implies that there is also verbal communication
- Q35 **Support:** broad meaning that is specified in each of the items, i.e. physical help, advice, having someone that listens to you and financial help.
1000 Euros in the EU15 and Norway, and 500 Euros in the 12 New Member states and the 2 candidate countries. For countries not having Euro as the national currency, ask for equivalent amount in national currency by current exchange rate
- Q36 **Caring for and educating children:** is broad and refers to bringing them up – it does not mean that the respondent is their teacher. The respondent could be caring for his or her own children, his/her grandchildren or for someone else's children (but not if this was part of a paid job).
- Q38 **Fair share** in the sense of the appropriate / right proportion
- Q41 **Social life:** meeting with other people, by choice and for enjoyment, outside of work in your free time.
- Q45 **Hampered:** bothered, limited, restricted
- Q46 **In good spirits:** happy, positive feelings
- Q49 *This is a country specific question and the content and number of answering categories will vary from country to country. The SHOW-CARDS are therefore*

country specific and should be inserted in each national questionnaire. The educational categories (codes and labels in the local language) from the European working conditions survey 2005 will be used as the reference

- Q54 **Water quality:** Tap water
- Q55 **Recycling facilities:** a place where people can bring goods for recycling purposes (does not include recycling bins on property).
- Q56 **State pension system:** refers to the quality of the entire compulsory state pension system. It is better to translate this directly then to refer to the name of the system (this can be put in brackets). In the Netherlands, for instance, the translation AOW is not sufficient. This should be in brackets.
- Q58 **Being in arrears:** falling behind on any payments that need to be made, not paying the payments on time.
- Q59 **Financial burden:** weighs heavy on the household budget

Use of **(NATIONALITY)** and **(OUR COUNTRY)**

- (OUR COUNTRY)/ (NOTRE PAYS) should be replaced by your country name
- (NATIONALITY)/ (NATIONALITE) should be replaced by the appropriate terminology (e.g. For UK = British)

4. Contact Sheet template

Selection of respondent

The definition of a household is:

"A household comprises one person living alone or a group of people living at the same address in a non-institutional dwelling, who have that address as their only or main residence, and who either share at least one main meal a day or share the living accommodation (or both)."

3 Including yourself, how many people aged 18 or over live in this household? (Look at inclusion rules in box below)

If '1' plan interview, else ask Q4

If no one eligible, please tick the box

and move to NEW ADDRESS (NEW CONTACT SHEET)

INCLUDE:

- People who normally live at the address but are away for less than 6 months
- People away at work for whom this is the main address
- Boarders and lodgers

EXCLUDE:

- People aged 18+ who live elsewhere due to work
- Spouses who are separated and no longer resident
- People away for 6 months or more
- People resident in country for less than 6 months

4 Ask for the name (or initial) and date of birth of each person aged 18+ in the selected HH. Select the respondent who has the first or last birthday, according to the rule used by agency (first or last birthday rule)

ANNEX 3

EQLS editing rules:

(Please note that in these instructions, 'F' = Fail and data had to be corrected, and 'W' = Warning and data had to be checked)

HH1 – if HH1=00 or 0 = (F)
if HH1>20 = (W)

HH2b – if HH2b<18 = (F)

HH2d – if HH2d=7 AND HH2b<45 = (W)
if HH2d=9 AND HH2b>40 = (W)

HH3c2– if HH3c2=2, HH2b must be at least 8 more than HH3b2 (F)
if HH3c2=5, HH2b must be at least 30 more than HH3b2
(F)

(do the same for HH3c3 etc...)

HH3d2 – if HH3d2=7 AND HH3b2<45 = (W)
if HH3d2=9 AND HH3b2>40 = (W)
if HH3d2=1 AND HH3b2<14 = (F)
if HH3d2=2 AND HH3b2<14 = (F)
if HH3d2=3 AND HH3b2<14 = (F)
if HH3d2=4 AND HH3b2<14 = (F)
if HH3d2=5 AND HH3b2<16 = (F)
if HH3d2=6 AND HH3b2<14 = (F)
if HH3d2=7 AND HH3b2<25 = (F)
if HH3d2=8 AND HH3b2<14 = (F)

(do the same for HH3d3 etc...)

HH3a2 to HH3d2 – is asked if HH1=2 or more
HH3a3 to HH3d3 – is asked if HH1=3 or more
HH3a4 to HH3d4 – is asked if HH1=4 or more
HH3a5 to HH3d5 – is asked if HH1=5 or more
HH3a6 to HH3d6 – is asked if HH1=6 or more
HH3a7 to HH3d7 – is asked if HH1=7 or more
HH3a8 to HH3d8 – is asked if HH1=8 or more
HH3a9 to HH3d9 – is asked if HH1=9 or more
HH3a10 to HH3d10 – is asked if HH1=10 or more

Q1 – is asked if HH2d is 3 to 10

Q2 – is asked if HH2d=1 or 2

Q3 – is asked if Q1=1

Q4 to Q6 – is asked if HH2d=1 or 2 **OR** Q1=1

Q6 – if Q6>120 (and not 999) = (F)
if Q6=72-120 = (W)
if Q6=0 or 00 or 000 = (F)

Q7 – is asked if HH2d=1 or 2

Q8 – is asked if Q7=1

Q8 – if Q8>120 (and not 999) = (F)
 if Q8=72-120 = (W)
 if Q8=0 or 00 or 000 = (F)

Q9 to Q11 – is asked if HH2d=1 or 2

Q12 – is asked if HH1=2 or more

Q13 – is asked if Q12=2

Q14 – is asked if Q13=1 to 4

Q15 – if Q15=0 or 00 = (F)

Q30 – if Q30=1 and HH3c2 (..HH3c3, 3c4 etc) is NOT 1 = (W)
 if Q30=2 and HH3c2 (..HH3c3, 3c4 etc)=1 = (W)
 if Q30=3 and HH3c2 (..HH3c3, 3c4 etc)=1 = (W)
 if Q30=4 and HH3c2 (..HH3c3, 3c4 etc)=1 = (W)

Q31 – if Q31>15=(W) (though Code 99 is okay)

Q32 – Code 7 is not allowed for Q32.4 (F)

Q33 – Code 7 is not allowed for Q33.4 (F)
 if Q32.1=7, then Q33.1 must also be 7 (same applies for Q33.2 and Q33.3) (F)

Q37a – is asked if Q36.1=1 to 4

Q37a - if Q36.1=1 and Q37a>168 (but not 99) (F)
 if Q36.1=1 and Q37a>50 (but not 99) (W)
 if Q36.1=2 and Q37a>96 (but not 99) (F)
 if Q36.1=2 and Q37a>30 (but not 99) (W)
 if Q36.1=3 and Q37a>48 (but not 99) (F)
 if Q36.1=3 and Q37a>20 (but not 99) (W)
 if Q36.1=4 and Q37a>24 (but not 99) (F)
 if Q36.1=4 and Q37a>10 (but not 99) (W)

Q37b – is asked if Q36.2=1 to 4

Q37b - if Q36.2=1 and Q37b>168 (but not 99) (F)
 if Q36.2=1 and Q37b>50 (but not 99) (W)
 if Q36.2=2 and Q37b>96 (but not 99) (F)
 if Q36.2=2 and Q37b>30 (but not 99) (W)
 if Q36.2=3 and Q37b>48 (but not 99) (F)
 if Q36.2=3 and Q37b>20 (but not 99) (W)
 if Q36.2=4 and Q37b>24 (but not 99) (F)
 if Q36.2=4 and Q37b>10 (but not 99) (W)

Q37c – is asked if Q36.3=1 to 4

Q37c - if Q36.3=1 and Q37c>168 (but not 99) (F)
 if Q36.3=1 and Q37c>50 (but not 99) (W)
 if Q36.3=2 and Q37c>96 (but not 99) (F)
 if Q36.3=2 and Q37c>30 (but not 99) (W)
 if Q36.3=3 and Q37c>48 (but not 99) (F)
 if Q36.3=3 and Q37c>20 (but not 99) (W)
 if Q36.3=4 and Q37c>24 (but not 99) (F)

- if Q36.3=4 and Q37c>10 (but not 99) (W)
- Q37d – is asked if Q36.4=1 to 4
- Q37d - if Q36.4=1 and Q37d>168 (but not 99) (F)
 if Q36.4=1 and Q37d>50 (but not 99) (W)
 if Q36.4=2 and Q37d>96 (but not 99) (F)
 if Q36.4=2 and Q37d>30 (but not 99) (W)
 if Q36.4=3 and Q37d>48 (but not 99) (F)
 if Q36.4=3 and Q37d>20 (but not 99) (W)
 if Q36.4=4 and Q37d>24 (but not 99) (F)
 if Q36.4=4 and Q37d>10 (but not 99) (W)
- Q38 – is asked if HH1=2 or more **AND** HH2b=18 or more and HH3b2 to HH3b10=18 or more at least one time.
- Q40_2 – if HH2d = 3-10 = (W)
- Q45 – is asked if Q44=1
- Q48 – if Q48=40 to 96=(W)
 if Q48=00 = (F)
 if Q48=99, then HH2d should be Code 9 (if not, = W)
 if Q48>HH2b = (F)
- Q49o – is asked if Q49=98
- Q65 – is asked if Code 1 has been selected two times or more at Q64. Only the items selected at Q64 can then be selected at Q65. (F)
- Q67 – is asked if Q66=1
- Q68 – is asked if Q66=2
- P5 – Allow blank values
- P6 – It is okay for one of these two codes to be blank
- P8 – Day must be 0 to 31
 Month must be 08, 09, 10, 11, 12, 01 or 02
- P9 – If 'hours'>23= (F)
 If 'minutes'>59= (F)
- P10 – If <10=(W)
 If >90=(W)
- P12 – multiple answers possible

ANNEX 6

Contact Sheet analysis – per country

| AUSTRIA - RESPONSE RATE CALCULATION | | | |
|--|-------------|--------------------------|------------------------|
| AUSTRIA | N | % of gross sample | % of net sample |
| Addresses used | 1940 | 100 | |
| Deadwood addresses + other | | | |
| Address not found/demolished | 12 | 0,62 | |
| Non residential address | 49 | 2,53 | |
| Area inaccessible/dangerous | 5 | 0,26 | |
| Other (appointment or incorrect CS) | 2 | 0,10 | |
| Total deadwood + other | 68 | 3,51 | |
| Non-eligibles | | | |
| No-one eligible at address | 0 | 0,00 | |
| Outcome of the visits - language difficulties | 17 | 0,88 | |
| Total non-eligible | 17 | 0,88 | |
| Net sample | 1855 | 95,62 | 100 |
| Non-contacts | | | |
| Results of visits - no reply | 190 | 9,79 | 10,24 |
| Outcome of the visits - no contact with selected adult | 82 | 4,23 | 4,42 |
| Outcome of the visits - selected adult away for fieldwork period | 5 | 0,42 | 0,27 |
| Outcome of the visits - selected adult ill at home/hospital | 2 | 0,04 | 0,11 |
| Outcome of the visits - selected adult physically or mentally unable | 4 | 0,21 | 0,22 |
| Total non-contacts | 283 | 14,68 | 15,26 |
| Refusals | | | |
| Results of visits - upfront refusal | 498 | 25,67 | 26,85 |
| Outcome of the visits - selected adult refused to be interviewed | 31 | 1,60 | 1,67 |
| Outcome of the visits - interview terminated | 0 | 0,00 | 0,00 |
| Total refusals | 529 | 27,27 | 28,52 |
| Response rate | | | |
| Deleted interviews after back-checking | 0 | 0,00 | 0,00 |
| Completed interviews | 1043 | 53,76 | 56,23 |

| BELGIUM - RESPONSE RATE CALCULATION | | | |
|--|-------------|--------------------------|------------------------|
| BELGIUM | N | % of gross sample | % of net sample |
| Addresses used | 2179 | 100 | |
| Deadwood addresses + other | | | |
| Address not found/demolished | 31 | 1,42 | |
| Non residential address | 4 | 0,18 | |
| Area inaccessible/dangerous | 0 | 0,00 | |
| Other (appointment or incorrect CS) | 34 | 1,56 | |
| Total deadwood + other | 69 | 3,17 | |
| Non-eligibles | | | |
| No-one eligible at address | 59 | 2,71 | |
| Outcome of the visits - language difficulties | 0 | 0,00 | |
| Total non-eligible | 59 | 2,71 | |
| Net sample | 2051 | 94,13 | 100 |
| Non-contacts | | | |
| Results of visits - no reply | 254 | 11,66 | 12,38 |
| Outcome of the visits - no contact with selected adult | 0 | 0,00 | 0,00 |
| Outcome of the visits - selected adult away for fieldwork period | 46 | 1,48 | 2,24 |
